Detailed Action

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 4-6 and 10-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. Claims 4-6 and 10-12 as amended 11/14/2008 each recite new matter.

By the amendment filed 11/14/2008, each of claims 4-6 and 10-12 now recite “a computer-readable medium.” However, the originally filed specification does not disclose or provide support for the recitation of “a computer-readable medium” or its equivalents as presently claimed. It is noted that the addition of “a computer-readable medium” to the instant claims was made to overcome a previously outstanding 35 U.S.C. § 101 rejection as advanced in the previous Office action (non-final Office action, mailed 09/23/08, pages 3-5, “the previous action”). However, page 4 of the previous action states “any amendment to the claims should be commensurate with its corresponding disclosure.” Since the amendment introducing “a computer-readable medium” into each of claims 4-6 and 10-12 is not commensurate with its corresponding disclosure, “a computer-readable medium” constitutes new matter, and each of claims 4-6 and 10-12 is rejected under 35 U.S.C. 112, first paragraph.

*Allowable Subject Matter*

3. Claims 1-3 and 7-9 are allowed.
4. Each of claims 1-3 and 7-9 is a process claim and has been analyzed in light of the “machine or transformation” test elucidated in In re Bilski. Claims 1-3 and 7-9 are found to comply with the machine prong of the “machine or transformation” test. Claims 1-3 and 7-9 require performing N-dimensional similarity space sub-pixel matching comprising determining an intersection point of N-dimensional hyperplanes and setting said intersection point as a sub-sampling grid estimation position. The above-noted steps, which are critical to the inventive concept, cannot reasonably be performed manually, and thus would necessarily require a particular machine (e.g. an image processor).

*Conclusion*

5. Applicant’s amendments necessitated the new grounds of rejection set forth herein; accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action
